

# Wilderness Camp Covid 19 Safety Protocols

## Campers are required to follow these Safety Protocols

---

### 1. Masks

Camp Directors and boat operators will wear masks while in the camp boat and in other circumstances that involve potential close interactions with people. Campers are asked to bring their own masks for the boat trip and wearing them in the boat will be a requirement - including children.

---

### 2. Sanitizers

#### Alcohol spray approved for sanitizing surfaces

Camp will supply a limited number of 32 oz bottles with 70% alcohol to keep in the boats and hang up at the outhouses. Keep these hung out of reach of small children.

Campers are asked to bring their own hand sanitizers and to sanitize hands before using camp watercraft, supplies or tools. A small supply of personal hand sprays of 70% alcohol will be available for campers to use. Scented or chemical cleaning products are discouraged.

---

### 3. Radio

Campers must wear a mask when speaking into the radio - and must spray the radios with 70% alcohol solution after each use.

---

### 4. Lifejackets

Campers are asked to bring their own life jackets if possible. Camp lifejackets will be available and sanitized as possible.

---

### 5. Protocol Undertaking

All campers are required to sign an additional protocol Undertaking to affirm they are not ill, symptomatic or required to self isolate. They use Camp at their own risk and understand the Camp cannot prevent possible virus transmission. No disputes about Covid19 Camp Protocols will be permitted in camp. Campers will follow the camp protocols for distancing, hygiene and safety.
